

Case: 02-C-1425

Verizon

Date of Request: November 26, 2003

VZ-ATT-59	As a follow up to the response to VZ-ATT-2, Please state specifically: (i) The dates when and jurisdictions where Mr. Walsh performed cross connects on main distribution frames in ILEC central offices. (ii) The dates and jurisdictions where any and all panel members monitored hotcuts on behalf of CLECs.
------------------	--

Respondents: Panel Members

RESPONSE:

- (i) See response to VZ-ATT-50. Mr. Walsh doesn't recall the exact dates in which he placed cross-wires for training purposes. The activities took place during the time he was employed by NYNEX as an ESS Conversion Supervisor, MLAC Supervisor and an Outside Plant Engineer (between 1978 and 1992). [
- (ii) Brenda Kahn meets regularly with other AT&T managers to review the hot cut experience and process provided by Verizon and other ILECs such as SBC, Qwest and Bell South. Michael Hou reviews CLEC hot cut experience in all the jurisdictions in which Broadview operates as part of his job. Mr. Walsh reviewed CLEC hot cut experience in preparation for this case and other hot cut cases.
